## **DETAILED ACTION**

### ***Response to Amendment***

1. Claims 1-19 were pending in the instant application at the time of the previous Office Action. Claims 4, 8, 9, 13, and 14 have been cancelled by the latest amendment. Therefore claims 1-3, 5-7, 10-12, and 15-19 are pending in this application and have been examined.

### ***Response to Arguments***

2. Applicant's arguments with respect to the pending claims have been considered and, when taken together with the changes made to the claim language are sufficient to overcome the rejections of the claims as found in the previous Office Action.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2137

4. Claims 1-3, 5 and 6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of copending Application No. 09/817,322. Although the conflicting claims are not identical, they are not patentably distinct from each other because they each claim nearly identical systems employed by a first application for supporting concurrent operations of a plurality of network applications, the systems including authorization / entitlement processors and communication processors where each generates a session identifier and communicates the identifier and an encryption key / user passwords for use in authentication operations.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### ***Allowable Subject Matter***

5. Claims 7, 10-12, and 15-19 are allowed.
